

How to make your own 15-Puzzle.

Make a photocopy of the picture above. Glue it on a piece of stiff, thick cardboard. (Crescent Illustration Board No. 215 works well.) Use a drafting knife (X-acto) or box-cutter to cut out the yellow frame and 15 numbered blocks. Discard the white spacer. Glue the frame on another piece of cardboard to form a tray. To help keep the pieces together, you can make a cover for your puzzle. Copy the picture on the right and glue it on another piece of cardboard.
